

LESSON PLAN	COURSE: MDM4U
Date:	Unit of Study: Unit 1
Materials/Resources: Mathmetics of data management study guide	Lesson Focus/Theme: Chapter 1: Tools for data management
Prior Knowledge: None	
Overall Expectations: By the end of this lesson, students will: Demonstrate an understanding of the applications of data management used by the media and the advertising industry and in various occupations.	
Specific Expectations: 3.1 interpret statistics presented in the media (e.g., the UN's finding that 2% of the world's population has more than half the world's wealth, whereas half the world's population has only 1% of the world's wealth), and explain how the media, the advertising industry, and others (e.g., marketers, pollsters) use and misuse statistics (e.g., as represented in graphs) to promote a certain point of view (e.g., by making a general statement based on a weak correlation or an assumed cause-and-effect relationship; by starting the vertical scale at a value other than zero; by making statements using general population statistics without reference to data specific to minority groups) 3.2 assess the validity of conclusions presented in the media by examining sources of data, including Internet sources (i.e., to determine whether they are authoritative, reliable, unbiased, and current), methods of data collection, and possible sources of bias (e.g., sampling bias, non-response bias, cultural bias in a survey question), and by questioning the analysis of the data (e.g., whether there is any indication of the sample size in the analysis) and conclusions drawn from the data (e.g., whether any assumptions are made about cause and effect) 3.3 gather, interpret, and describe information about applications of data management in occupations (e.g., actuary, statistician, business analyst, sociologist, medical doctor, psychologist, teacher, community planner), and about university programs that explore these applications	

Learning Goals:

By the end of this lesson, students will know the database, data management software and so on

Success Criteria:

By the end of this lesson, I will be able to know the data management software

By the end of this lesson, I will be able to know the database

By the end of this lesson, I will be able to know the simulations

Assessment Strategies: Tests, quiz and project

Time:
10 min

Introduction/Minds-On:

Answer questions students don't understand from last class if any

Time:
100min

Lesson:

Chapter 1: Tools for data management

1.1 Data management software

1.2 Database

1.3 Simulations

Time:

10 min

Extension / Wrap-up:

Review the key concepts and formula for this lesson

Notes / Reminders / Homework:

Lesson Reflection:
