

LESSON PLAN	COURSE: MDM4U
Date:	Unit of Study: Unit 1
Materials/Resources: Mathmatics of data management study guide	Lesson Focus/Theme: Chapter 3: Statistics of two variables
Prior Knowledge: Statistics of one variables	
Overall Expectations: By the end of this lesson, students will: Analyse, interpret, and draw conclusions from two-variable data using numerical, graphical, and algebraic summaries;	
Specific Expectations: 2.1 recognize that the analysis of two-variable data involves the relationship between two attributes, recognize the correlation coefficient as a measure of the fit of the data to a linear model, and determine, using technology, the relevant numerical summaries (e.g., summary tables such as contingency tables; correlation coefficients) 2.2 recognize and distinguish different types of relationships between two variables that have a mathematical correlation (e.g., the cause-and-effect relationship between the age of a tree and its diameter; the common-cause relationship between ice cream sales and forest fires over the course of a year; the accidental relationship between the consumer price index and the number of known planets in the universe) 2.3 generate, using technology, the relevant graphical summaries of two-variable data (e.g., scatter plots, side-by-side boxplots) based on the type of data provided (e.g., categorical, ordinal, quantitative)	

Learning Goals:

By the end of this lesson, students will know the scatter plots, linear correlation, and linear regression

Success Criteria:

By the end of this lesson, I will be able to do the scatter plots

By the end of this lesson, I will be able to know the linear correlation

By the end of this lesson, I will be able to know the linear regression

Assessment Strategies: Tests, quiz and project**Time:**
10 min**Introduction/Minds-On:**

Answer questions students don't understand from last class if any

Time:
80 min**Lesson:**

Chapter 3: Statistics of Two variables

3.1 Scatter plots and linear correlation

3.2 Linear regression

Time:**Extension / Wrap-up:**

10 min

Review the key concepts and formula for this lesson

20 min

Quiz #1

Notes / Reminders / Homework:

Review for test #1

Lesson Reflection:
